

Aditya Kumar

Seattle, WA | +1 (206) 290-7706 | adikum26@uw.edu | linkedin.com/in/aditya-kumar05 | github.com/AdiKum26

EDUCATION

University of Washington

B.S. in Computer Science, Direct Admit

Seattle, WA

Expected June 2028

- **GPA: 3.83**, Dean's List (All Quarters)
- **Relevant Coursework:** Artificial Intelligence (AI), Machine Learning (ML), Data Structures & Algorithms, Distributed Systems, Systems Programming, Hardware/Software Interface, Foundations of Computing I-II, Data Management

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, Swift, SQL, C, JavaScript, HTML/CSS

AI/ML: LLM evaluation, few-shot prompting, LLM-as-a-judge, PyTorch, Scikit-learn, Whisper, CatBoost

Frameworks: React Native, React, Node.js, Express, Firebase, SwiftUI, Jetpack Compose

Cloud/Systems: AWS (Bedrock, Lambda, Glue, DynamoDB, API Gateway), Azure OpenAI, Git, CI/CD, Power BI, Tableau

EXPERIENCE

LinkedIn

Incoming Software Engineer Intern - First Play Program

Mountain View, CA

Summer 2026

Amazon

Incoming Junior Software Development Engineer - Kindle IBEX, iOS/Android Reading Experience

Seattle, WA

Aug 2026

Paul G. Allen School of CSE - UW Systems Lab

Undergraduate Research Assistant

Seattle, WA

Jan 2026 - Present

- Analyzed 500+ agent execution traces across BFCL, AppWorld, and MCP-Universe to identify failure modes in multi-agent large language model (LLM) systems
- Built an LLM-as-a-judge evaluation pipeline for API-driven agent workflows, achieving $F1 = 0.61$ with similarity-based few-shot prompting
- Automated parsing of execution logs and stack traces to benchmark system-level agent failures at scale

AI Vision Technologies (Finderly)

AI Software Engineer Intern

Austin, TX

Oct 2025 - Jan 2026

- Shipped product features for a React Native AI home-repair assistant with 5,000+ active users
- Built a real-time voice pipeline using Azure OpenAI APIs for speech and generation, plus TTS, for hands-free guided repair, reducing user friction and improving session engagement
- Deployed AI speech workflows into production via Git-based Continuous Integration and Continuous Delivery (CI/CD)

WITS University BIS

Data Engineering Intern

Johannesburg, South Africa

Jun 2025 - Jul 2025

- Built AWS Glue ETL pipelines over 200K+ course records and dimensional data models powering Power BI dashboards, enabling faculty to identify 50+ at-risk students per cohort
- Applied SQL, Python, and ML-based anomaly detection to surface patterns across fees, grades, and dropout trends, directly informing student-support interventions

PROJECTS

Seekr - Autonomous Research-Matching Agent

AWS Bedrock (Claude 3), Lambda, DynamoDB, React, TypeScript

- Built a retrieval-to-generation agentic pipeline that ranks UW students against research labs and drafts personalized outreach emails

OuraNote - AI Journaling App

React, TypeScript, Firebase, Whisper, GPT-4o-mini

- Launched an AI journaling app (30 active users) with LLM-based sentiment analysis, emotional check-ins, and a Whisper voice interface; designed end-to-end user flows for reflective writing and AI-assisted introspection

DubsTech Health ML Hackathon

Python, CatBoost, Pandas, NumPy, Tableau

- Trained a CatBoost model (93.4% accuracy) on 1.8M+ NY SPARCS hospital records to predict discharge costs; ranked 4th internationally, results visualized in Tableau

LEADERSHIP

BookSmart - Technical Director | Led technical architecture for textbook resale platform serving 40,000+ UW students; owned end-to-end development and deployment of a Gemini Flash AI agent with Supabase integration, eliminating inbound support post-launch

Startup Club at UW - Director of Events | Launched official website & ran pitch events with 50+ participants
